---

6/19/02.

Gerry,

I thought I had sent a sundry notice on the Calmon #3, but in going thru the files I can't find one, therefore must not have sent one. I now understand the confusion concerning the original MIT chart I had sent on the Calmon #3. I'm sending a sundry w/ the particulars on the conversion & re-sending the chart.

I am lining up some step rate tests on these two wells, the Calmon #1 & #3, but I do have a tracer survey on the Calmon #3 showing the water is staying in zone. I'll send you a copy of that but will also proceed w/ the step rate tests.

Thanks for everything

Robert Lee.
