CHANGE PLANS

SUBSEQUENT REPORT OF:

WATER SHUT-OFF  
FRACTURE TREATMENT  
SHOOTING OR ACIDIZING  
(Other)

REPAIRING WELL  
ALTERING CASING  
ABANDONMENT\*

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Intend to set retrievable bridgeplug above present perms, perforate and treat the 1st Bone Spring sand and then set a bridge plug above those perms and perforate and treat the San Andres formation. Our plans are to acidize the 1st Bone Spring and acidize and frac the San Andres.

If a successful completion attempt is made in either formation we will produce from that zone. If not, we will remove the bridge plug and continue to produce the present perforations in the Bone Spring formation 8178'-8296'.
