RE: PMS 8 Federal Well No. 5
Unit D, 8-18-31

Dear Mr. Williams,

Amoco respectfully requests permission to produce the subject well at 1/2 its assigned casinghead gas allowable/limit until such time as our casinghead gas overproduction is absorbed (25,532 MCF overproduced as of July, 1992, 2,649 of which was absorbed in August - see attachment).

Faulty testing equipment led us to extrapolate estimated monthly gas production volumes that were substantially less than what was actually being produced. Said testing equipment is currently being repaired so that this problem will not re-occur.

Thank you for your consideration of this request. If you have any questions, please contact me at the letterhead address, Room 16.112, or by telephone at (713) 556-3744.

Sincerely yours,

Matt Wines
Hobbs Administrative Group

REQUEST APPROVED
