13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent data, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On 11/8/93, we began completing this well in the San Andres formation. We perforated from 2050' - 2088' (7 holes) and ran a build-up test. On 11/12/93, the San Andres "C" zone was perforated from 2001' - 2042' (10 holes) and acidized with 5600 gals. 15% HCl acid. We ran another build-up. On 11/19/93, we perforated the San Andres "B" zone from 1908' - 1975' (9 holes) and acidized with 4700 gals 15% HCl acid. We ran a build-up on this zone. On 11/24/93, we perforated the San Andres "A" zone from 1846' - 1863' (5 holes) and acidized with 1500 gals. 15% HCl acid. A build-up was run on this zone. Currently, the well is shut-in waiting for further stimulation (gelled water frac).
