Directionally Drill

13. Describe Proposed or Completed Operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The prime location for this well lies in the middle of Playa Lake. It was necessary, therefore, to move the location in order to get this well permitted. The Wiser Oil Company now requests permission to directionally drill this well from the above cited, permitted surface location in accordance with the attached plan. The bottom hole location will be 1290' FNL, 1226' FWL, Unit D, of Section 27, Township 17 South, Range 31 East, N.M.P.M. An application for directional drilling is pending before the New Mexico Oil Conservation Division.
