

The diagram illustrates a well site layout with the following components and dimensions:

- Top Section:** A horizontal bar labeled "Casing" and "Pumpjack" with a total length of 150'. It is divided into four 30' segments.
- Left Section:** A vertical bar labeled "Pads for down cross pads" with a width of 45' and a height of 45'.
- Central Wellhead:** A circular wellhead is located at the center of the layout, with a 15' radius indicated.
- Mud Pump:** A rectangular unit labeled "Mud Pump" is located below the wellhead, with a 125' distance indicated from the wellhead.
- Trailer House:** A rectangular unit labeled "Trailer House" is located to the right of the mud pump.
- Bottom Section:** A horizontal bar labeled "45' x 145' Bottom" is located at the bottom of the layout.
- Dimensions:**
  - Overall width: 270'
  - Overall height: 200'
  - Wellhead radius: 15'
  - Distance from wellhead to mud pump: 125'
  - Distance from mud pump to trailer house: 125'
  - Distance from mud pump to bottom bar: 125'
  - Distance from wellhead to casing/pumpjack: 150'
  - Width of casing/pumpjack: 45'
  - Height of casing/pumpjack: 45'
  - Width of bottom bar: 45'
  - Height of bottom bar: 145'
