 The elevation of the Rotary Drive Bushing 4444 ft. above sea level is 3543 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After drilling to a total depth of 10,486' the above well was plugged and abandoned as follows:

Set 25 sack cement plugs as follows: 10,486 to 10,436; 8150 to 8090; 7050 to 6990; 6400 to 6340; 3600 to 3540. Shot off and pulled 2952' of 9-5/8" casing. Spotted 25 sack cement plug at 3000' in stub of 9-5/8" casing and at 700' in bottom of 13-3/8" surface pipe. Plugging was completed by setting 25 sack plug in the top of surface pipe in which was placed a 4" pipe marker extending 5' above ground level. Work was completed 2-27-53.

The ground level has been restored to conform to the surrounding terrain.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
