17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The following procedure for re-converting the injection well to oil producer is proposed:

- (1) Release packer, pull tubing
- (2) Inspect tubing
- (3) Re-insert good tubing as a work string
- (4) Swab-test well
- (5) Put on pump if swab test is positive
- (6) Will acidize with a small acid cleanup if needed
- (7) Re-run rod in and put on tubing pump to pump off water until oil cut improves...then put insert pump to replace tubing pump.
