17. (If well is being recomplected, clearly state all pertinent details, and give pertinent dates, including estimated date of starting any new work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

S & J Operating Company began operating this property on 12/84. This well was apparently converted to water injection in 10/81. Sun Oil Company, operator at the time, obtained state approval; however, we do not find a BLM approval in the files.

This well is part of an active secondary recovery project. This well was pulled in 9/87, packers were reset and tested at this time.
