We request that this well be classified as Temporarily Abandoned. The East Millman Unit is an active waterflood project with an ongoing infill drilling program and plans for conversion of existing wells to additional water injection wells. This well has beneficial use as a producing well or a future water injection well subsequent to the infill drilling program which will be completed over the next 3 years. Depending upon the success of the infill drilling program, well No. 6-5 will be reactivated as a producer or converted to a water injection well sometime during the next 3 years.

A casing integrity test will be performed during the week of October 2, 2000.
CEBP can be set 100' above Top Perforations.
