Detailed account of work done, nature and quantity of materials used and results obtained.

Ran 290' of used 8-5/8" casing using mud. Verbal permission to use mud was given by W. L. Armstrong because of the possibility that water might be encountered at a lower depth making it necessary to pull the 8-5/8", stright ream the hole and run additional casing to insure complete water shut-off. If the well is found suitable for completion the surface pipe will be picked up and cemented with 50 sacks of cement.
