Re: State "A" (Sec 36, T-19S, R-28E)

Dear Mr. Smith,

I am writing pursuant to our telephone conversation the other day regarding the above referenced well. As we discussed, I am experiencing difficulty with previous interest owners to authorize my AFE to complete the Plugging and Abandoning operations due to the failure of Baber Well Servicing Co. to honor their commitment to assume operations on the well in return for the assignment of our interest in the well. The assignment were made by us and are of record in Eddy County.

It appears that I will be required to assume all costs involved in completing operations. I will need a little extra time to accomplish this but should be able to complete operations within 120 days. As you are aware there was a retrievable bridge plug placed just above the shoe of the surface casing at the time operations were temporarily suspended. Thank you for your understanding in this matter. I will notify your office prior to commencement of work.

Sincerely yours,

Billy R. Wilson
