Change in Ownership from Western Oil Fields Inc.

Intend to plug and abandon well as originally filed with the following exception:

In lieu of setting bridge plug at 1750 with 20 sack cement plug spotted on top of plug, we will set a cement retainer run on 2" tubing at 1750' and then squeeze 100 sacks cement below retainer to properly plug the exposed Queen sand zone. We will then spot a 10 sack cement plug at the surface in the 7" casing with a surface marker set as originally planned.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
