DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location to approximately 1650 feet to test the Seven Rivers section.

We propose the following casing program:

8 5/8" at 250 feet - to be pulled if a dry hole

4 1/2" at TD - 100 sacks of cement

* Sufficient cement to isolate all water zones

NOTIFY USGS IN SUFFICIENT TIME TO

WITNESS CEMENTING THE 4 1/2" CASING

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
