*7" casing cut off @ 2930' & removed.

This well was originally drilled to a depth of 12,429' and plugged and abandoned in January, 1967. The name of the well was the Sunray DX Oil Company New Mexico "Q" State #1.

Manzano proposes to change the name of the well to Oso Rojo #1, reenter the well, and clean out the hole to approximately 8000'. We propose to attempt to complete the well in the Bone Spring formation. We will use a 6" 900 Series Shaffer BOP during operations.
