Attention: Mr. E. T. Anderson

Gentlemen:

Reference is made to your letter of February 6, 1961, wherein you point out that your Federal "F" Well No. 3, a dual completion in the Yates and Queen zones, has declined to the point where the Yates is producing an average of less than three barrels per day and the Queen is producing some seven or eight barrels per day. The production from this well is commingled with Queen production from two other wells on the same lease which also make approximately seven or eight barrels per day each.

Order No. B-1481 authorized the commingling of production from these two pools provided that each would be separately metered prior to such commingling. It is our understanding that now the wells have become so marginal, it is no longer economically feasible to test and recalibrate these meters and that you desire to discontinue metering the production and would base your production from each zone upon periodic tests of the wells involved.

The separate metering requirement in Order No. B-1481 was only intended to be applicable until such time as every one of the subject wells had
