Yates Bros.

Well No. Perkins# 1 is located 330 ft. from $\begin{Bmatrix} N \\ S \end{Bmatrix}$ line and 2310 ft. from $\begin{Bmatrix} E \\ W \end{Bmatrix}$ line of sec. 6

SW SE	19S	30E	N.M.P.M.
($\frac{1}{4}$ Sec. and Sec. No.)	(Twp.)	(Range)	(Meridian)
E. Turkey Tract	Eddy	New Mexico	
(Field)	(County or Subdivision)	(State or Territory)	

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

We intend to drill to approximately 4100 feet, unless oil is encountered at a lesser depth. We plan to set approximately 350 feet of 8-5/8 inch casing, cemented with 50 sacks of cement. If oil is encountered at approximately 2000 feet will set 7 inch casing and cement with 100 sacks of cement, if no oil encountered at this ~~xxx~~ depth will test Delaware at approximately 4,100 feet and if producer will set 7 inch casing on top and cement with 150 sacks of cement, if water zone is encountered around 2,300 feet, otherwise, 100 sacks of cement. Sample description logs will be furnished.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
