Mr. L. A. Hanson
OIL CONSERVATION COMMISSION
Carper Building
Artesia, New Mexico

Dear Bob:

Before I grant this increase, I would like for you to tell me what pool the well is now in. If, as he says, it is in the East Turkey Track Pool, a new C-104 and C-110 will be required. I will not contact the operator but will leave that up to you in regard to the C-104 and C-110. Upon receipt of the approved C-104 we will cancel the allowable in the Santo Nino Pool and assign a new allowable in the East Turkey Track Pool.

I approved a form C-126 for 238 barrels of load oil.

Very truly yours,

A. L. Porter, Jr.
Proration Manager
