Well No. **2-13** is located **1650** ft. from **S** line and **1750** ft. from **W** line of sec. **13**
SE 1/4 **13** **19S** **30E** **NMPM**
 (Sec. and Sec. No.) (Twp.) (Range) (Meridian)
East Benson-Yates **Eddy** **New Mexico**
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3419** ft.**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has 5 1/2" casing cemented on bottom with all formations being protected. Casing is perforated in the regular Yates pay zone at 2180-2196; 2199-2207. Production has declined to the point where it is non-economical to produce, however, it is possible we will later use this well for secondary recovery purposes and have temporarily abandoned.

Well is shut in with 2" valve on tubing and required sign on location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
