October 23, 1967

Well No. ~~2-43~~ is located 1650 ft. from [N] line and 1750 ft. from [W] line of sec. 13.30 NW 13  
(1/4 Sec. and Sec. No.)19S  
(Twp.)30E  
(Range)NMPH  
(Meridian)East Benson-Yates  
(Field)Zddy  
(County or Subdivision)New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 3419 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has 5" casing cemented on bottom with all formations being protected. Casing is perforated in the regular East Benson-Yates pay at 2180-2196; 2199-2207. Production declined to the point where it was not economical to produce. Since it is possible that this pay may respond to secondary recovery the well was temporarily abandoned with the idea of using it when such operations are started.

Well is shut in with 2" valve on tubing and required sign on location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
