13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

February 13, 2002

Trip in hole with 19 jts. of tubing last joint sticking badly. Received approval from BLM to pump cement from here since we could not get down to about 800' where the top of the casing tubing and rods were supposed to be. RU Schlumberger and pumped 187 sx of class C neat to get cement back to surface. Based on cement volumes and circulation, it appeared that a significant amount of cement went down hole to render the well adequately plugged and abandoned. Installed dry hole marker and cleaned location.

Approved as to plugging of the well bore.  
Likely under bond is retained until  
surface restoration is completed.

Cathy with BLM witnessed P&A operations.
