ARTESIA, OFFICE

August 5, 1961

Mr. M. L. Armstrong
New Mexico Oil Conservation Commission
P. O. Drawer DD
Artesia, New Mexico

I hereby certify that all of the offset operators have been notified by letter, on this date, that we intend to plug and abandon our No. 1 State Well located in the "D" Unit, 825 feet from the north and west lines of Section 25, T19S, R30E, NNPM, Eddy County, New Mexico, as soon as possible. These offset operators and the locations of their leases are as follows:

Northwest: Union Oil Company
Section 23, T19S, R30E
North: Gulf Oil Corporation
Section 24, T19S, R30E
West: Cosden Petroleum Corporation
Section 26, T19S, R30E
East and South: G. W. Strake
Remainder of Section 25, T19S,
R30E

C. R. Mote
Prod. Supt.

[illegible]

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, gather relevant information and data. This may involve research, consultation with experts, or collecting data from various sources.

3. Once the information is gathered, analyze it to identify patterns, trends, and potential solutions. This step often involves critical thinking and problem-solving skills.

4. After analysis, develop a plan or strategy to address the problem. This plan should outline the steps to be taken and the resources needed.

5. Implement the plan and monitor progress. This involves putting the strategy into action and regularly checking on the results to ensure they are on track.

6. Finally, evaluate the outcome and make adjustments as needed. This step involves reflecting on what worked, what didn't, and how to improve for the future.
