Re: Oil and Gas Lease
Las Cruces 062376

Dear Sir:

Reference is made to your well No. 1-Yates located in the SW¹/₄SW¹/₄, section 28, T. 19 S., R. 30 E., N.M.P.M., wildest area, Eddy County, New Mexico, the drilling of which was approved February 24, 1956.

The well is within the oil-potash area and the drilling of same was subject to compliance with New Mexico Oil Commission Order No. R-111 A. Furthermore, it was specifically conditioned, see condition No. 3, on notifying this office in sufficient time to arrange for a representative to witness the cementing operations and water shut off tests. This was not done. It is imperative that the oil operators cooperate one hundred percent in the oil-potash area.

Commission Order R-111, and amended Order R-111 A requires, among other things, that the fluid used to mix the cement shall be saturated with the salts common to the zones penetrated and with suitable proportions but not less than one percent of calcium chloride by weight of cement. Your Sundry Report, which was returned for further information, did not include sufficient information to indicate this was done. Therefore, you are requested to furnish this office with a copy to Mr. Prots, Potash Company of America, a letter setting forth how the casing was cemented and if Order R-111 A was not complied with in full your justifications for ignoring the conditions of approval are in order.

Very truly yours,

John A. Frost
District Engineer
