DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well is now producing less than one barrel of oil per day and is no longer economical to operate. As of August 1, 1961, the well has been temporarily abandoned. Well will be shut in at the surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
