DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well No. 4 temporarily shut-in due to low productivity. We do not intend to plug and abandon due to the fact that we plan to expand our present waterflood to a fullscale 5-spot waterflood and this well would be an injection well. Plan of work will be submitted prior to commencing operations.
