In re: Malco-Taylor "A"
Well No. 4
Shugart Pool

Dear Mr. Stamets:

The above referred to well has been put back on production after having been temporarily shut-in in August 1965. The well has been erroneously reported since August of having an allowable and producing approximately 2 barrels per day. We do not receive a monthly allowable schedule on this field, although numerous requests for this information have been made, and the party responsible for preparing the Form C-115 was unaware that the well did not have an allowable until receipt of your letter of January 14th.

We are submitting Form C-127 requesting that this well be reinstated with an allowable of 2 barrels per day effective February 1, 1966. We are also filing with the U. S. G. S. Form 9-331 advising them that the well has been put back on production.

Yours sincerely,

Joseph D. Kennedy
