November 22, 1954

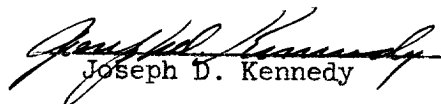

New Mexico Oil Conservation Commission
205 Carper Building
Artesia, New Mexico

Gentlemen:

Enclosed are the required number of copies of New Mexico Oil Conservation Commission Reports Nos. C-104, C-105 and C-110 on the J. C. Maxwell, A. C. Taylor No. 3-B.

No actual potential test has been taken on this well because the packer can not be unseated and a pumping unit can not be installed until the packer can be removed. The indicated potential of 45 barrels per day is based on swabbing tests after having recovered all of the load and treating oil.

Yours sincerely,

Joseph D. Kennedy
