17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production on this well had declined to 1/2 BOPD + 99% water. The well was shut in during August, 1969. We now propose to P & A as follows:

1. Set 30 sack cement plug from 3510-3380'.
2. Shoot off and recover 7" casing as deep as possible
3. Set these cement plugs:
30 sx in and out of 7" stub.
30 sx across 8-5/8" shoe, @ 950'.
10 sx in top of well.

Salt gel mud will be used to spot all plugs. 8-5/8" casing string will remain intact. A dry hole marker will be installed and location cleared & levelled.

18. I hereby certify that the foregoing is true and correct
