Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is pumping 4 barrels of oil and 5 barrels of water per day. It is proposed to stimulate the well by re-perforating at 3326-35 with 30 holes and 3343-60 with 18 holes. We will then frac the well in two stages using 10,000 gallons and 5,000 gallons of Redi-frac plus 1 to 1½ pounds of sand per gallon. The frac will be preceded with 165 gallons of S #9 gyp scale preventor. Verbal approval of this program was given on June 3, 1969, by Mr. Beekman.
