Well No. Malco #1 is located 1900 ft. from N line and 1000 ft. from E line of sec. 10
NW 34 Sec 10 19 South 31 East Block
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
North Shugart Sady New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Per our report of Jan 8, 1954 we have plugged this well as follows: We put a plug of 10 sacks of cement in the bottom of the hole (TO 3629 SLW). We put a plug of 10 sacks in the bottom of the 7" set at 3001 ft. Then we cut the 7" off at 2561 ft. We put a plug of 15 sacks below the base of the salt (1710) and a plug of 15 sacks in the bottom of the 6 5/8" set at 706 ft. We then cut the 6 5/8" off at 505 ft and put a plug of 10 sacks in the top of the 6 5/8" left in the hole. We put a plug in the top of the hole, filled the cellar and put up a regulation marker. The space between the plugs was filled with mud. We moved the rig off and cleaned up the location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
