Well No. **Keechane I** is located **330** ft. from **N** line and **330** ft. from **W** line of sec. **25**
SW SW Sec. 25 **18 S** **31 E** **N. M. P. M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated **Shugart** **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **—** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled to 2960' in January 1958. 7" 20# casing was set at 2945' and cemented with 100 sacks.

Propose to drill well to approximately 4000' to test the Queen's Sections. After testing this section, will run 3 1/2" or 4" csg. through pay zones and cement same back to bottom of 7". Will log, perf., treat and knock oil string off at top of cement and pull same. Run tubing and rods and put well on producing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
