1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed. 2. The second step is to set goals. These should be specific, measurable, achievable, relevant, and time-bound. 3. The third step is to develop a plan. This involves identifying the resources needed and the steps to be taken. 4. The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress. 5. The fifth step is to evaluate the results. This involves comparing the actual results with the goals and making adjustments as needed.
