2. *How do you feel about the fact that you are a woman?*

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If pigs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing. Completed dry. Plugged and abandoned. Left 250' or 3-5/8" surface casing set and cemented at 261' with a total of 150 sacks cement. Did not produce any oil.
