MESSAGE

Leon:

Sorry to be so late w/ this answer: - We have not set this Bridge-plug and would like to re-consider and abandon this; due to:

- 1 Need for additional w. to expand injection pattern & rages.
- 2 Double-Eagle (City of Carlsbad) Wtr. Co. has notified us they will limit amount of available (F.) Water in future.
- 3 We are sure we can also produce enough (by increased capacity pumping equipment) oil & gas to make this economically feasible.

Sincerely

----- D.R. Bell
