17. SKETCH PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

We wish to keep this well on T.A.(shut-in with B.P. @ 3020 Ft.) status. Pressure tested to 500 psi as required (BLM) o.k. on 6-13-86 and witnessed by Pete Hines. There is no water flow in this area. There is possible oil and gas production in upper zones (Yates/7R). We would need to negotiate with original owner concerning these, which in this case is John Trigg. He also has the right, per unit agreement, to purchase this well back before any P. & A. for \$1100.00. Due to depressed oil prices at this time, we would all like more time.

The well is not in any trouble and is filled with treated water. Took only about five gals. to fill annulus to test.

Please direct all future "Clifford Cone", Culwin Queen Unit, correspondence to P.O. Box 136, Lovington, N.M. 88260, Attn: Don Bell or Bonnie Murph, so that we can process more promptly.

Our telephone numbers are: office, 396-3062 mobil, 676-3353
