## 1. Introduction

The purpose of this study is to investigate the effects of various factors on the performance of a system. The study is divided into two main parts: a theoretical analysis and an experimental investigation.

The theoretical analysis is presented in Section 2.

The experimental investigation is presented in Section 3. The results of the experiment are discussed in Section 4.

The conclusions of the study are presented in Section 5.

The study is organized as follows: Section 1 is the Introduction, Section 2 is the Theoretical Analysis, Section 3 is the Experimental Investigation, Section 4 is the Results and Discussion, and Section 5 is the Conclusion.
