13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On 10/14/93, we submitted an application to deepen this well. After reviewing our application, the BLM requested the enclosed data regarding BOPs and H2S contingency plan. The arch survey requested is forthcoming.

Also, please note regarding disposal of cuttings:

We will have earthened working pits approximately 80' long x 10' wide x 5' deep. These pits will be lined with 6 mil plastic. Drill cuttings will be disposed into these pits. The working pits will be rehabilitated after the contents of the pits are dry.
