Well No. Hinkle B is located 1650 ft. from XXX line and 2310 ft. from XXX line of sec. 34
SE 1/4 Sec. 34 16 S 31 E N.M.P.M.
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Shugart 1650
 (Field) (County or Subdivision)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to Yates sand which will probably be encountered from 2660' to 2750'.

We plan to run 920 feet of 8 1/2" 24# 2nd hand casing, and to cement same with 50 sacks cement; and 2620 feet of new 7" OD 20# seamless casing, and cement with 100 sacks cement.

We expect to begin this work as soon as permission to drill is granted.

We plan to test the Yates Pay Zone, and then bridge back with gravel and Cal-Seal before cementing oil string.

We plan to furnish your office a sample log by Neil Wills from surface to total depth, in lieu of an Electrical log, as we are only testing the Yates Zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
