Artesia, N. Mex. July 9, 1958

By McFadden
Well No. 1 is located 330 ft. from N line and 330 ft. from E line of sec. 3
NE 1/4 Sec. 3 19S 31E 10W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Shurt Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well from a present depth of 2751 feet to approximately 3500 feet to test the queen formation. If we encounter production in the lower zones we will run a production string of 5 1/2" casing and cement case with 100 sacks. 7" casing is now cemented at 2635 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
