February 3, 1964

Well No. #1 is located 660 ft. from [N] line and 990 ft. from [E] line of sec. 4NE/4 NE/4 Sec. 4 188 31E NMP
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Shugart Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Production on this well has declined to approximately 3 barrels of oil + 50 barrels of water per day. 5 1/2" casing is cemented to the surface and there are perforations open at 3640-34, 3506-03, and 3399-89. We propose to plug well as follows:

Fill hole with fluid. Set cement plug at 3650 to 3350 with 40 sacks and place 10 sacks of cement at surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be recommenced.
