RE: ~~Miller Federal #1-0~~
~~Sec. 5-21-27~~
Dagger Draw #1-0
Sec. 6-20-25

Gentlemen:

Monsanto respectfully requests that the subject wells be granted an exception to the annual packer leakage test due to the danger in shutting the wells in. The latest well tests and pressure are listed below:

~~Miller Federal (Morrow): 2500 MCF, 40 BC, FTP = 700~~
~~(Atoka): Shut in; SICP = 1000~~

Dagger Draw (Morrow): 470 MCF, 0 BC, 60 BW, FTP = 450
(Strawn): Shut in; SICP = 2111

The Dagger Draw well will load up and die due to the water production. Offset wells to the Miller Federal in the Morrow have lost large portions of their productivity when shut in. Burton Flat No. 1 dropped from 6 MMCF to 2 MMCF after being shut in. Burton Flat No. 2 has also shown a decline in production after shut in.

Yours very truly,

E. M. Scholl

E. M. Scholl
