Re: Non-Standard Location
Catclaw "AGM" State Com. #2
600' FSL & 600' FWL
Section 2-T20S-R24E
Eddy County, New Mexico

Dear Mr. Stogner:

Yates Petroleum Corporation request administrative approval for the non-standard location as provided for under NMOCD Rule 104F.

On May 10, 1990, I requested a Non-standard location for this well to the North Dagger Draw Upper Penn and intermediate formations. I sense have learned that we wish to also test the Morrow and intermediate formations. As I stated in my previous letter, the well was drilled by Standard Oil Company of Texas as the State 2 #1 and was plugged on December 10, 1965. Yates wishes to re-enter and deepen the well to test the Morrow and intermediate formations as it would be much more economical to do the re-entry and testing of this well by cleaning out the existing well bore to 4424' and then deepen to 9350'. The location is 600' FSL and 600' FWL so it is very non-standard, but we feel it would be more economical and beneficial to the State of New Mexico and Yates to re-enter and deepen this existing well bore.

Yates Petroleum Corporation is the operator and or leasehold owner of all the lands surrounding this well. Enclosed please find a copy of a plat (Form C-102) and a lease map with land dedication and well location.

If you have any questions, please give me a call.

Very truly yours,

YATES PETROLEUM CORPORATION

Ken Beardemphl
