Re: DWU Federal #1
1980/S & 1980/E
Sec. 34-19S-28E

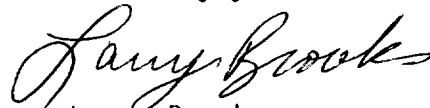

Gentlemen:

According to the information submitted on your proposal to recomplete, production would be established from zones between 10,350 and 10,850' and considered Atoka. If the gross interval is perforated it would not comply with our rules. This well is one of the Nomenclature Committee's cross-section logs. The tops are as follows:

Wolfcamp,	8772
Penn.	9649
Strawn	9979
Atoka	10343
Mor. Ls.	10783
Mor. Cl	10877

If you have any questions concerning this matter please contact me at this office.

Sincerely yours,

Larry Brooks
Geologist
