

Development plan for surface use to accompany, "Applications to Drill Onshore Oil, Gas, or Geothermal Steam Wells on Public Domain and acquired Federal Lands:"

1. Existing roads. See attached map. East-West half Section line road is maintained for existing wells.
2. Planned access roads. Will be along existing roads, which we will improve. See attached map. Final 900 feet of road will be new road.
3. Location of wells. See attached map
4. Lateral roads to wells locations. See attached map
5. Location of tank batteries and flowlines. See attached map. Will build tank battery approx. 100' south of location with direct flowline to
6. Locations and types of water supply. Existing water located 3 battery miles to NE of well.
7. Methods for handling waste disposal. Engine oil and trash will be disposed of in waste pit.
8. Location of camps. None
9. Location of airstrips. None
10. Location layout to include position of the rig, mud tanks, reserve pits, burn pits, pipe racks, etc. See sketch below.
11. Plans for restoration of the surface. Pits will be dried and leveled except for burn pit. Otherwise surface restored to original.
12. Any other information which the Approving Official considers essential to his assessment of the impact on the environment. Topography is small rolling hills except to north, where ground drops into 10' to 20' deep dry draw approximately 300 feet north of well.
Ground cover is variety of native grasses w/scattered tumbleweed and grease-wood. Soil is caliche

The affected Federal and State surface managing agencies shall have access to or, if feasible, may be provided with copies of such development plans.
