Re: Commingling Gas Production  
Winchester Field  
Eddy County, New Mexico

Gentlemen:

Reference is made to your application for authority to commingle Winchester-Wolfcamp gas production from your DWU Well No. 2, located in Unit F of Section 35, and Winchester-Morrow gas production from your DWU Well No. 1, located in Unit J of Section 34, both in Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico, after passing the production from each well through its own separation equipment and metering the gas production. It is our understanding that by commingling the aforesaid production in this manner it will be possible to utilize a single compressor to put the gas into the sales line.

Your request is hereby approved subject to the provision that this approval could be rescinded in the event either or both of these pools becomes prorated.

Very truly yours,

JOE D. RAMEY  
Secretary-Director
