NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

RECEIVED

MAR - 4 1974

I, Monroe V. Roberts, being of lawful age and having full O. C. C.
Name of party making report ARTESIA, OFFICE

knowledge of the facts hereinbelow set out do state:

That I am employed by Penroc Oil Corporation in the capacity of

Vice Pres.-Production, that on January 16, 1974

I personally supervised the setting of a Otis Permatrieve, PW-J Latch and MWH Snapset
Make & type of packer

in Penroc Oil Corporation, Dero-Federal "A" Comm.,
Operator of well Lease name

Well no. 1 located in the Winchester field,

Eddy county, state of New Mexico, at a subsurface depth of

10,120', 9995' & 8910' feet, said depth measurement having been furnished me by

Otis by Mack Chase, Inc.;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Monroe V. Roberts
(Signature)

Vice-President of Production
