3/26/74

Contractor: Warton Drlg. Rig 5

Test by Yellow Jacket Tools and Services, Inc.

=====Transposition of the pressure recorder chart=====

The above is a transposition of the pressure recorder chart covering test to the blowout control equipment in service on your well drilling in the Artesia Area, Hobbs District, New Mexico. Test was made with test plug landed in casing head with the following test results:

TESTING: Blind Rams with outside valve closed off stack on kill line and all valves closed off choke-manifold cross - pressure applied thru guage connection.

Test #1 Pressured to 3000# with loss of pressure; repressured to 3000# with loss of approximately 200# during first eleven minutes then leveling out for remaining two minutes of test.

NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 2800#.

TESTING: Pipe Rams with all outside valves closed off stack - pressure applied down drill pipe.

Test #2 Pressured to 300# and released air; repressured to 400# and
