Gentlemen:

Barbara Fasken respectfully requests that an exception to Statewide Rule 402 be granted for the subject wells. These wells have exhibited substantial reductions in their producing rates each time the compressor that serves them has malfunctioned and shut down. Both wells produce at rates less than 200 mcfpd and simply cannot stand the loss of deliverability that will be realized if they are shut in.

Your attention to this matter is most appreciated. Please call me at 915-687-1777 if you have any questions.

Yours truly,

Fasken Oil and Ranch Interests
