No well will be assigned an allowable greater than the amount of oil produced on the official test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is tested by more than 15 percent, and shall be commingled to take advantage of this 15 percent tolerance in order that well can be assigned an allowable of 15 percent of the pool's production.

Gas-oil ratio test shall be conducted on a production base of 15,000 production of 100% gas. The allowable shall be 0.60.

Report showing results of test for any well, including through casing.

Well engineer and any other person responsible for the effect of the New Mexico Oil Conservation Commission in accordance with the 301 and applicable provisions.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
