Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The operator has had no experience in plugging and abandoning wells in this area, however, it is the intent of the operator to adequately plug and abandon the subject well in accordance with OCC regulations. A typical summary of the anticipated procedures is listed below. (Actual footage will be supplied as work progresses.)

Bridge plug + 100' plug over perforations at 7718'
100' plug at the stub (in & out)
100' plug at the top of the Glorieta; anticipated at approximately 2300'
100' plug (in & out) at the base of the intermediate casing, 8-5/8", anticipated at 1115'
10' plug at the surface with appropriate marker
Clean and grade location

Note: There will be no intermediate or surface casing pulled on this well since cement was circulated on both strings during drilling operations.

24 hour notice will be given to the U.S.G.S. before setting bottom plug.

18. I hereby certify that the foregoing is true and correct.
